

APPLIED MATHEMATICS AND COMPUTATION

VOLUME 88

C. MUSÈS

- The Dimensional Family Approach in (Hyper)sphere Packing:
A Typological Study of New Patterns, Structures, and
Interdimensional Functions 1

A. KANANTHAI

- On the Solutions of the n -Dimensional Diamond Operator 27

MARCO FRONTINI AND ALDO TAGLIANI

- Entropy-Convergence in Steiltjes and Hamburger
Moment Problem 39

B. MICHALLAND, E. PARENT, AND L. DUCKSTEIN

- Bi-objective Dynamic Programming for Trading Off
Hydropower and Irrigation 53

J. G. WEI AND G. LENG

- Lyapunov Exponent and Chaos of Duffing's Equation
Perturbed by White Noise 77

G. ADOMIAN, R. C. RACH, AND R. E. MEYERS

- Numerical Integration, Analytic Continuation, and Decomposition 95

G. ADOMIAN

- Explicit Solutions of Nonlinear Partial Differential Equations 117

G. ADOMIAN

- Optical Propagation in Random Media 127

G. ADOMIAN

- On KdV Type Equations 131

MING-JYI JANG AND CHIEH-LI CHEN

- Analysis of the Response of Strongly Nonlinear Damped System
using Differential Transformation Technique 137

(Continued)

Y. C. HON, M. W. LU, W. M. XUE, AND Y. M. ZHU Multiquadric Method for the Numerical Solution of a Biphasic Mixture Model	153
EDMOND A. JONCKHEERE AND CHUNG-KUANG CHU Bounded Flatness in Q -Triangulated Regular N -Simplexes	177
J. I. RAMOS Linearization Methods for Reaction-Diffusion Equations: 1-D Problems	199
J. I. RAMOS Linearization Methods for Reaction-Diffusion Equations: Multidimensional Problems	225
DAN G. TUCKNESS Phase Space Sensitivities on the Sun-Jupiter Triangular Libration Point	255
FRANK G. LETHER Constrained Near-Minimax Rational Approximations to Dawson's Integral	267
JUN ZHANG AND JOHN A. BELWARD Chebyshev Series Approximations for the Bessel Function $Y_n(z)$ of Complex Argument	275
J. M. SORIANO On the Number of Zeros of a Mapping	287
IL-KWON JEONG AND JU-JANG LEE Evolving Multi-Agents Using a Self-Organizing Genetic Algorithm	293
